

My Daily Time & Goals Tracker

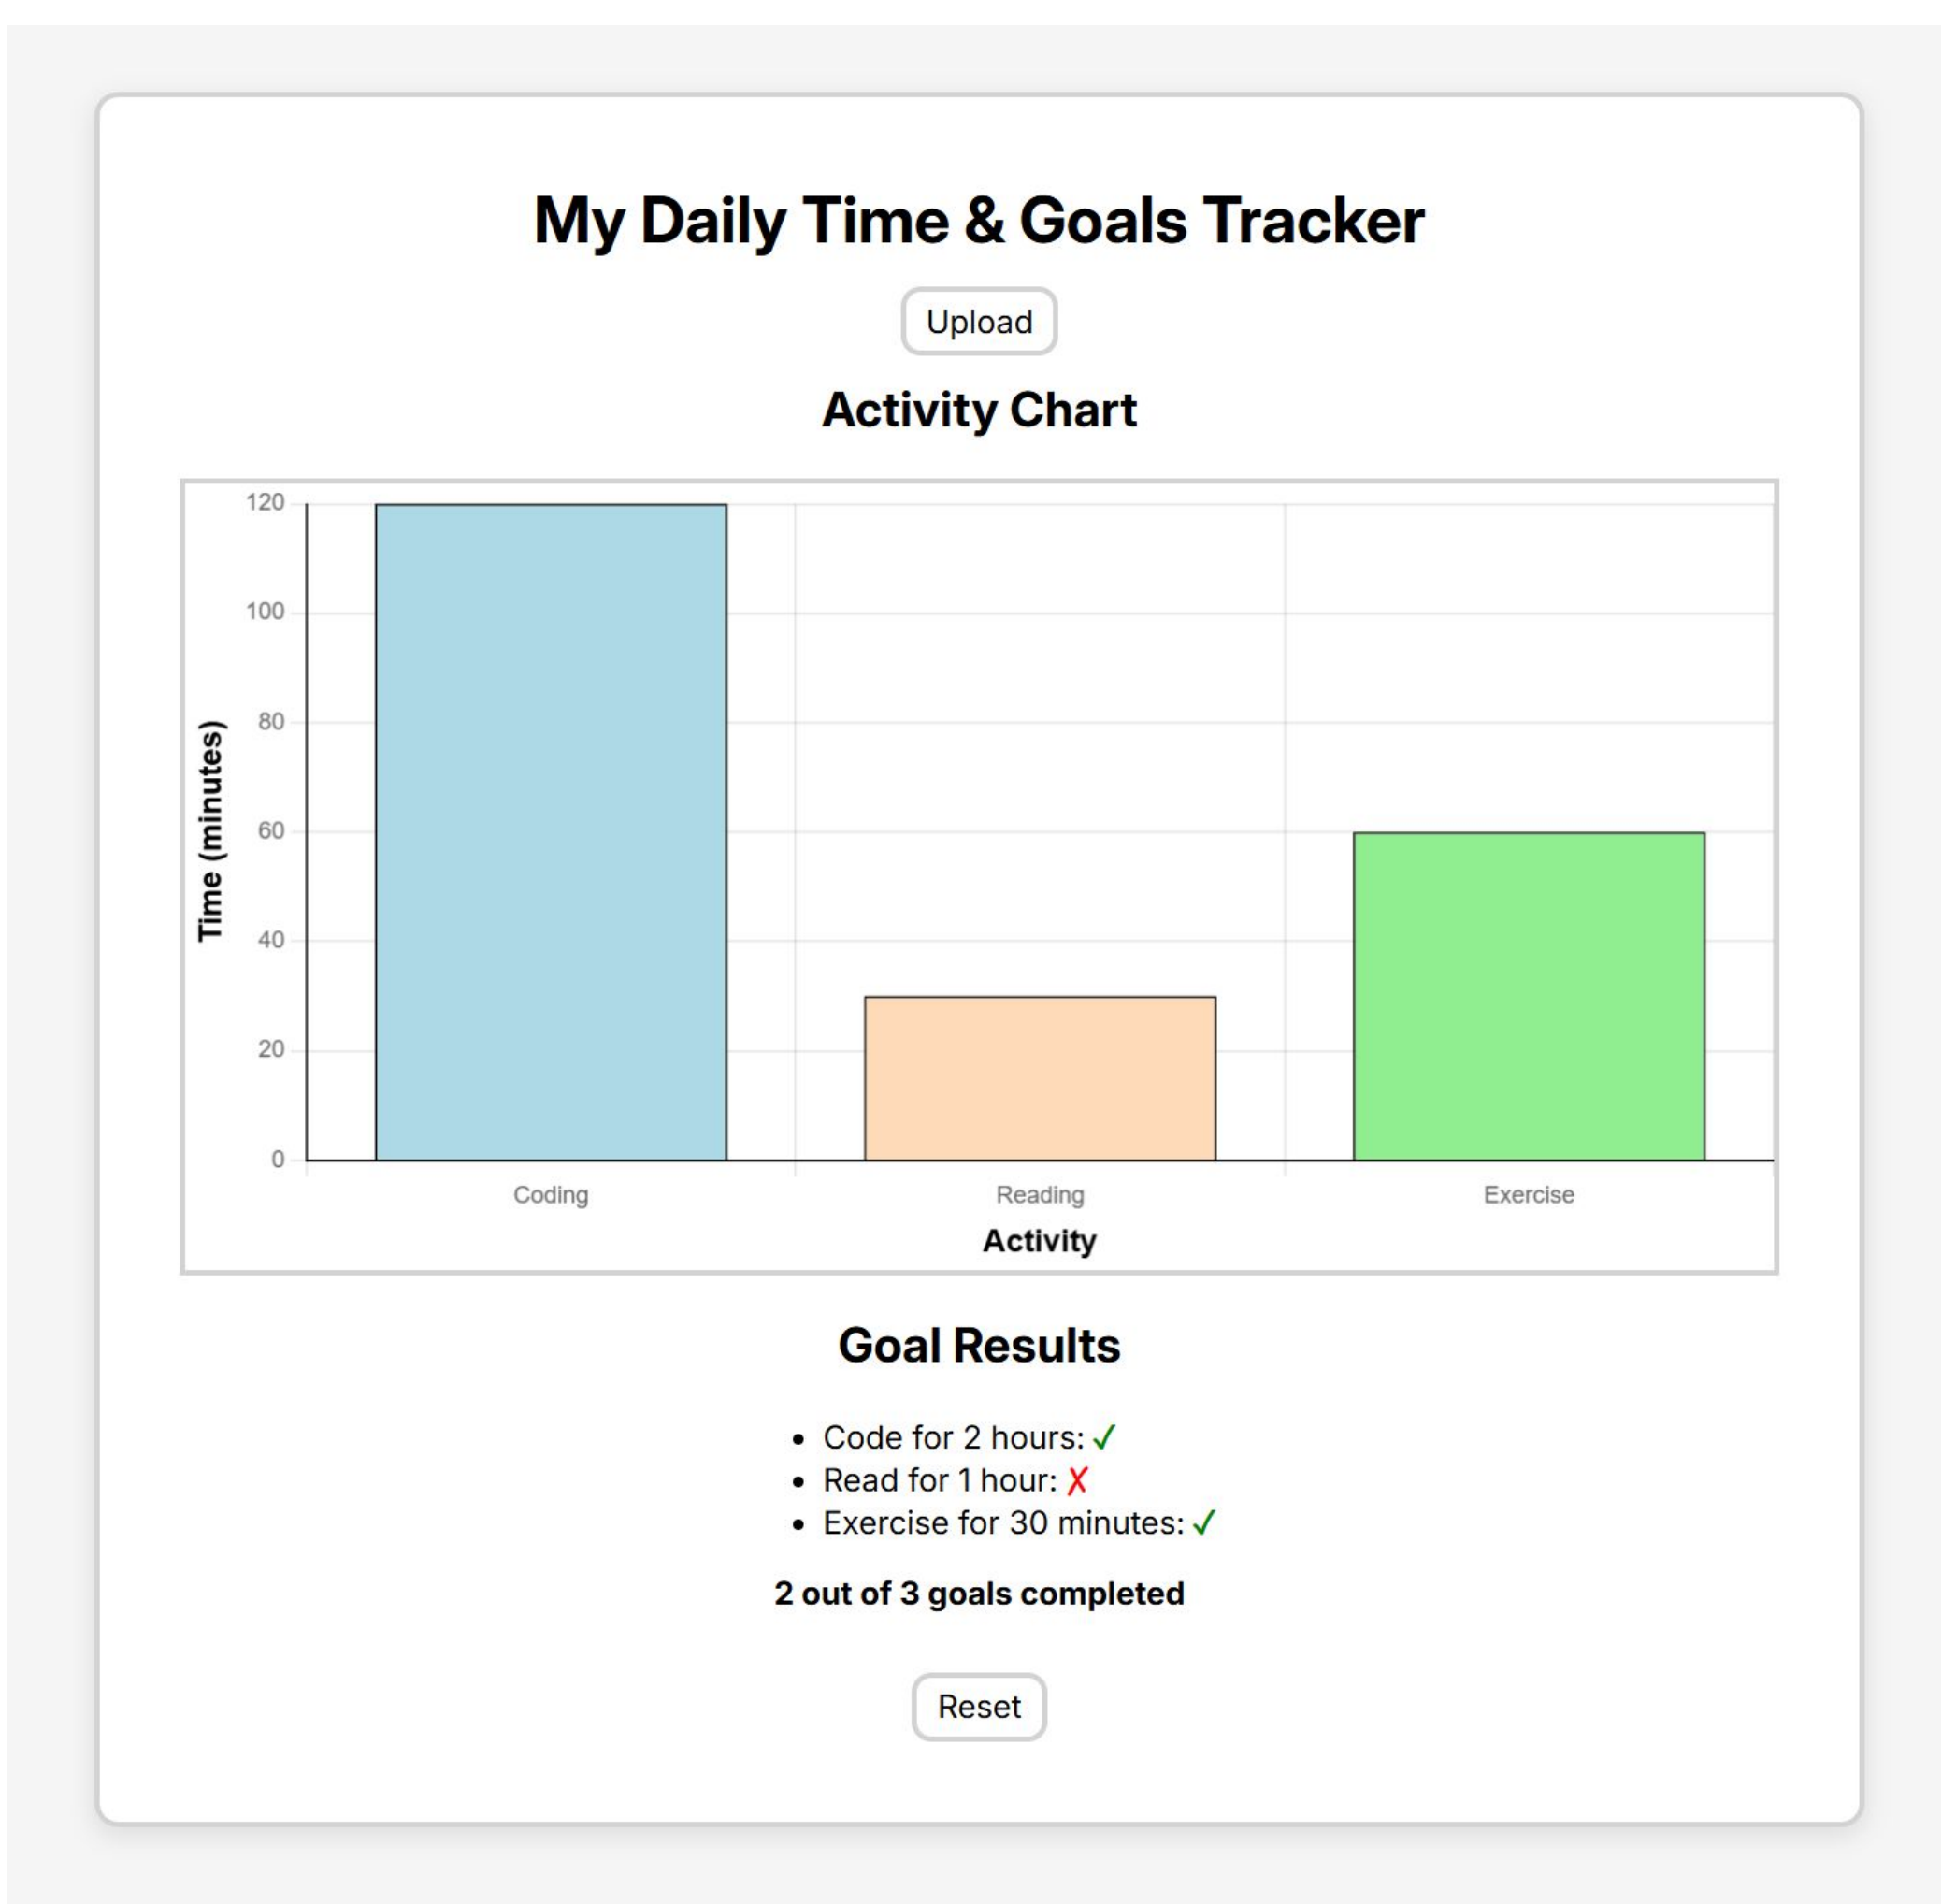

Archie Mallett University of Plymouth

Overview

MDT>: My Daily Time & Goals Tracker is a single-page application that visualises how users spend their time through a bar chart and shows goal progress by providing a tick or cross next to each goal with a simple goal summary underneath displaying how many goals were met. It's designed for students and everyday users who want a quick, focused way to stay organised.

Design Principles

- **Clarity:** Only the essential elements are shown - activities, goals and progress
- **Instant Insight:** Data is displayed immediately after uploading the JSON file
- **Organised Structure:** Uploading, chart generation, goal checking and resetting are handled by separate functions
- **User Focused:** Built for people who want fast visual feedback to support their daily workflow
- **Smooth Flow:** A clean top to bottom layout keeps the experience simple and uninterrupted

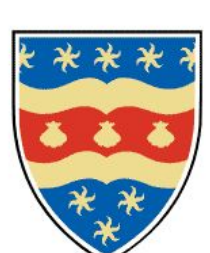

Key Features

- **JSON Upload:** Imports user activity and goal data instantly through a click of a button
- **Bar Chart:** Shows time spent on each activity
- **Goal Tracking:** Tick or cross indicators show whether each goal is met
- **Goal Summary:** Counts how many goals were completed or missed
- **One Click reset:** Clears the dashboard for a fresh start
- **Single Page Design:** All updates happen without reloading

Why It Matters

- Helps users quickly understand how their time is used
- Makes goal progress easy to see at a glance
- Supports better planning and productivity for students and everyday users
- Encourages reflexion and improvement in daily workflow
